ONLINE MEETINGS

An online meeting, which was held on 6 April 2023, aimed to discuss the progress of the project. Discussions included the translation of teaching materials, preparation for the upcoming pilot session, the development of the project leaflet and the substantive content of the evaluation questionnaire for students.

During the next online meeting, which took place on 25 May 2023, the partners debated on the pilot session and the final version of the project leaflet. In addition, the layout of the website including the positioning of particularly important elements, such as the link to the platform, were discussed. The next online meeting has been scheduled for 22 June 2023.

PILOT TESTING

Result 2 was developed to provide young students with expertise in design, engineering and platforms suitable for design, at the same time enhancing their transversal skills. During the pilot session aimed at gaining feedback on the online course (Result 2), students from vocational schools (a minimum of 10 in each partner country) actively participated in an evaluation of the course entitled 'The Art of Green Districts'. Through the participation in the session, students gained new skills and knowledge in the field of Sustainable Design or 3-D printing, but also identified some areas for improvement of the course.

TRANSNATIONAL PROJECT MEETING IN REUS, SPAIN

The third transnational project meeting took place in Reus, the capital of Baix Camp, in the province of Tarragona, Catalonia, Spain, on 30-31 January 2023.

The meeting was organised by DOMSPAIN.

During the two-day meeting, the partners provided updates on their designated tasks.

All raised concerns were addressed and resolved, and specific next steps and responsibilities of each partner were defined. Furthermore, deadlines for the completion of the nearest tasks were set.

FURTHER STEPS

ONLINE MEETING

The partners have scheduled another online meeting for June 22 to review and discuss the results of the pilot session of the online course (Result 2), and give an update on the Young Engineer's e-Portfolio (YEP) Handbook (Result 3).

TRANSNATIONAL MEETING IN GREECE

The partner, e-Nable Greece, will host the 4th Transnational Project Meeting in Athens, Greece, in October 2023. They will provide the rest of partners with an Infopack that will encompass basic information about the Greek culture, the venue of the meeting, public transport options, and the agenda for the event.
