TRANSNATIONAL PROJECT MEETING IN ATHENS, GREECE

The 4th and final Transnational Project Meeting (TPM) took place in Athens on October 9-10, 2023, and was organized by e-Nable Greece. We discussed the project's deliverables, namely the completion of the Design Course 'The Art of Green Districts' (Intellectual Output 2), necessary corrections of YEP Handbook (Intellectual Output 3), and project management issues. Partners also addressed dissemination and promotion of project activities, and there was an extensive discussion on the planning, organization, and implementation of multiplier events.

ONLINE MEETINGS

An online meeting, which was held on 31 August 2023, aimed to discuss the progress of the project. Discussions included the evaluation of IO2 (Intellectual Output) improvements, the dissemination activities, the forthcoming Transnational Project Meeting (TPM) in Athens, and the organisational details of the multiplier events.

The next online meeting was devoted to the platform improvement and its manual, dissemination activities, the project website, and management issues.

MULTIPLIER EVENTS

From October to December 2023, the partners carried out dissemination activities in their respective countries.

These activities involved an extensive presentation of the STEAM3D Academy project. Specifically, the project's objectives, the target groups, and all deliverables were presented to the audience.

Additionally, the conference attendees could see the website, e-platform and familiarized themselves with all educational materials developed in the project. The design course as the project's output was introduced with proper diligence. During some events, VET students actively participated in a series of roundtable discussions.

FURTHER STEPS

The partners are planning further elaboration or modification of the course developed in the course of future joint initiatives.
